

Safety information

For safety, use only an adapter approved by Alcatel. Alcatel does not bear responsibility for any faults that may arise due to non-conformation to this guide. Example:

- Do not, in any way, cause a short-circuit. It may start a fire or the phone may explode causing injury.
- Do not create a sudden impact on the battery by throwing it.
- Do not dispose off batteries by putting them in a fire. They may explode or catch fire due to the electrolyte within.

Caution

- Do not use the phone with a car battery.
- Avoid using the phone in high temperature or humidity. Avoid spilling any liquid on this phone. If the phone gets wet, switch off phone and turn off AC power supply.
- Keep the phone dry. Submersion, humidity, and liquids contain minerals that may corrode internal electronic circuits.
- Do not store or use the phone in dusty or dirty areas as this can damage the moving parts.
- Do not store the phone in hot/ cold areas.
- Do not attempt to open it. Non-expert handling of the phone could damage it.

Consult your authorized Alcatel dealer for assistance.

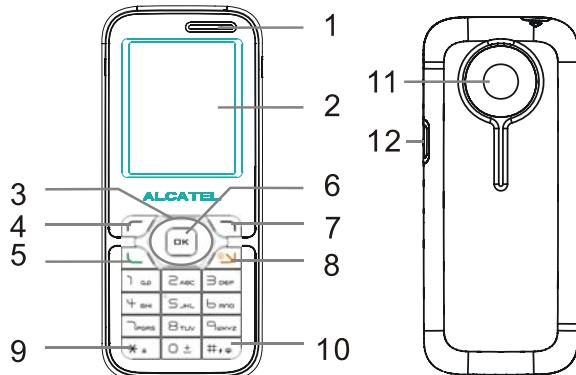

- Do not drop, knock or shake the phone. Rough handling may break the internal circuit boards.
- Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe it with a soft cloth that has been slightly dampened in a mild soap and water solution.
- Do not paint the phone. Paint can clog the phone's moving parts and prevent proper functioning.
- During lightning, do not touch the power plug or the phone line. It may result in an electric shock or death.
- Do not install the phone under direct sunlight or on an uneven surface.
- Before using the plug, check the available power voltage. Inaccurate power voltage may cause fire and damage.

	Indicate roaming when home network is not available.
	Indicate that have insert SD card.
	Indicate that is using MP3 player.
	Indicate that using data service.

1 Getting Started

Installing your Battery

You must install and charge the battery to use your phone.

Insert the ridge at the top of the battery into the peak of the phone, then push down the base of the battery and snap it into place.

Charging the battery

The battery is not fully charged when you purchase your phone. Fully charge the new battery for approximately 12 hours before using

the phone for the first time.

To charge the battery, connect the AC adapter to the jack located at the side of the phone, then connect the adapter's plug to an AC wall outlet. The battery icon at the top-right corner of the screen tells you whether the phone is Charging, Partially charged or fully charged.

Recharging the battery

You can safely recharge the battery at any time, even if it has a partial charge.

Caring for the battery

This section describes important safety information and tips for improving battery performance.

General safety guidelines

This phone contains an integrated Li-Ion battery.

- Do not attempt to open the battery compartment and dismantle, puncture, or short-circuit the battery.
- If you have not used the battery for more than a month, recharge it before using your phone.
- Avoid exposing the phone to extreme temperatures, direct, sunlight, or high

- humidity.
- Never dispose of used batteries in or near a fire. It could lead to explosion. Check with your local regulations for proper disposal instructions.

Common causes of battery drain

The following operations drain the battery more quickly and thereby adversely affect talk and standby times:

- Playing games frequently.
- Frequent use of the backlights.
- Using data cables or accessories, such as the Hands-free headset.
- Operating when no service is available, or service is available intermittently.
- High earpiece and ringer volume settings.
- Unacknowledged text message alerts.

Battery performance

750mAh(standard battery)	
Standby time*	130hours
Talking time*	120-150 minutes

2 Making and Received Calls

Making a call

1. Make sure you are in an area where the signal can be received. Look for the symbol on the home screen.
Note: The more bars you see in this symbol, the stronger the reception. If there are no bars, try to move to where the reception is better. In some cases, this can be as simple as changing the direction you are facing.
2. Enter the phone number.
3. To dial the number, press the Send/ Receive key.
4. To end the call, press the End/Power key .

Redialing a number

To redial the last number called, press the Send/ Receive key twice.

Calling a saved number

If you have already saved a phone number, you can use the **Contact** list to find it quickly.

1. Select **Menu -->Contact**.
2. Find the contact you want, then press the

Send/Receive key to dial the number.

3. If the number has been added to the Speed Dial list, you can dial it directly by pressing its Speed Number then press the Send/Receive key.

Answering a call

When you receive a call, the phone rings, vibrates, and/or lights up, and an animated phone icon appears. The number of the caller also appears if it is not restricted. If the number is stored in your Contact directory, the contact name appears.

To answer the call, press the **Send/Receive** key.

Note: If you have Call Waiting as part of your service, you can answer incoming calls when you are already on a call. When on a call, you will hear a beep tone. Select Answer to put the current call on hold and answer the new call.

Setting the way to answer a call

Select **Menu -->Settings -->call -->other -->Auto answer.**

All incoming calls can be answered automatically.

Dealing with missed calls

When you have missed a call, a tip will be displayed on your screen.

- To clear the screen, press OK key or End/Power key.
- To view the caller's number or name, select recent calls to access the Missed Calls.

Setting up speed dial

Speed dialing allows you to quickly dial a stored phone number by entering a one-digit speed dialing location. To save a number to speed dial:

1. Select **Menu -->contact -->speed dail.**
2. Select one number and input one phone number then press OK to save.

Using 1-Touch Dialing

To dial a phone number, simply press and hold the assigned speed dial number for the phone number. For example, if the Speed dialing number is 5, press and hold 5.

Supply Services

Let you enable/disable some supplement services provided by your network operator. Consult your local network service provider for

more information about these services.

Call Waiting

When Call Waiting is activated, if you are in a call and another call is incoming, there will be an alert and the new calling number will be displayed on the screen. You can choose to answer it or reject it. If the new call is answered, the former one will be hold and you can toggle between the two calls by Send key.

1. Select **Menu -->Settings -->call -->Supply Services -->Call Waiting.**
2. Select an option from the list.
on: Open the Call Waiting
Off: Close the Call Waiting
3. To confirm, press OK.

Call Forwarding

To forward your calls to another phone number:

1. Select **Menu -->Settings -->call -->Supply Services -->Forward** as some condition.
2. Enter the number you wish to forward all your calls to.
3. To confirm, press OK twice.

Emergency numbers

Calling emergency numbers

You can call all three-digit emergency numbers even if your phone is locked or your account is restricted. However, when you call, your phone enters Emergency mode.

3 Entering Letters, Numbers and Symbols

You may enter letters, numbers, and symbols in the Contact, SMS and other menu functions.

Text entry modes

There are five text entry modes:

- T9Es
- Es
- En
- Ab
- 123

Note: The mode you start in depends on the task you are performing. For example, when entering a phone number in the Contact menu, the default text mode is Numbers. When entering a name for a contact, the default text mode is the Input Mode.

Entering numbers

To enter a number while in Numbers mode, press a number key once.

To enter a number while in Multitap mode, press a number key more times until the number

appears on the screen.

Entering words letter by letter

Es mode and Ab mode:

1. Press the appropriate alphanumeric key once to display the first letter that appears on the keypad, twice for the second letter, and so on.
2. Wait for the cursor to move to the right before you enter the next letter.

You can enter the Es words or Ab words.

Entering words quickly

T9Es mode and En mode:

When you press a series of keys using the mode, it checks the built-in dictionary for common words and predicts the word you are trying to spell.

1. For each letter of the word you wish to spell, press the appropriate alphanumeric key once. For example, to enter the word "any" press the alphanumeric keys **2 -->6 -->9**.
2. If the word suggested by this mode does not match what you want, press the UP or DOWN Navigation Key to view other word matches.
3. When you see the word you want, to

confirm your choice press OK.

Entering symbol

Press and hold * key, you can enter the symbol.

Changing input modes

Press the # key to change input modes.

Quick reference to text entry

This table gives general instructions for entering letters, numbers.

To...	Do this...
Enter a letter	Press the appropriate alphanumeric key repeatedly until the letter you want appears on the display.
Enter a number	Press and hold the appropriate number key until it appears on the display. If you are in Numbers mode, then press the number key once.
Erase a character	Press right soft key.
Erase all characters	Press and hold right soft key.

Move the cursor right or left	Use the RIGHT or LEFT Navigation Key.
-------------------------------	---------------------------------------

4 Storing Contact

The Contact menu of your phone is like a set of phone index cards for you to store information about a person or a company.

Saving a phone number

To save a phone number, do the following:

1. From the home screen, enter the phone number you wish to save.
2. Press the Left soft key to select Add to. You can choose the position.
3. Enter the name of the contact then press OK.
4. If you choose add to the phone, you can record others. For example: 4 numbers, email, URL, Memo, make the group.

Adding a pause

When you save the phone number of an automated service, you may include a pause where you need to select an option or enter a Password. You can enter multiple pauses in a phone number. A Pause will cause the phone to stop dialing until you select the Release key. To enter a phone number with a pause:

1. Enter the first portion of the phone number.
2. Press and hold * Key, a letter **P** will appear at the end.
3. Enter the remaining part.
4. Save the number. (See “Saving a phone number if needed”).

Find the contact

1. Select **Menu -->Contact**.
2. Select **search by name, search by group**. You can find the contact quickly.
 - **search by name:** input the name, then press OK to view.
 - **search by group:** view the record according the group.

Viewing Memory Status

1. Select **Menu -->Contact -->Contact management -->Memory Status**.
2. Press OK to view the memory status of Phone or UIM card.

5 Recent calls

Viewing recent call details

Details on the last 10 calls you have missed, made or received are stored in the Recent Calls list. You can get details on the caller's name and phone number, along with the time and length of the call.

Viewing recent calls:

1. Select **Menu -->Recent Calls**.
2. Select an option from the list: **Missed Calls, Received Calls or Outgoing Calls**.
3. To confirm, press OK.
4. Select a phone entry, Press OK to confirm.
5. Select an option from the list.

Call Timer

Your phone includes three timers that count the duration of the calls you have made and received. To view call timers:

1. Select **Menu -->Recent Calls -->Call Time**.
2. Select an option from the list:
 - **Total Received Calls** — The duration of incoming calls received by the phone since

- the timer was last reset.
- **Total Dialed Calls** — The duration of outgoing calls made by the phone since the timer was last reset.
- **Total Calls**— The duration of all outgoing and incoming calls since the phone was manufactured.

3. Press left soft key, you can clear the record.

6 Sending and Receiving Text Message

This chapter describes how to send, receive, and erase text messages from your phone.

Important: The features and menus described in this chapter may vary depending on services available in your area. In addition, usage charges may apply to each message. For clarification on these issues, check with your service provider.

1 New message

You can edit the message.

When text is OK, press OK key to enter “Send to” display. You can enter phone numbers manually with numeric keys.

Or

Press Left Soft key to select number from the phonebook.

Shortcut

You can set that pressing the Multi-Directional keys to enter some menu from idle display.

Backlight

You can set the backlight on or off, and set the start and end time.

Auto key lock

Set the auto key lock as on or off.

5 Auto power on/off

Let you Set auto power on / off. When set as on, you can set the time.

12 High Speed Data Service

Your phone support high speed data service. Connect PC to your phone via a specific data cable (optional accessory, sold separately), and you can surf the Internet where there is network coverage.

Procedures:

1. Connect PC to your phone with the data cable (use USB port of your PC).
2. When the connection is done, PC will find this new device and prompt you to install its driver (which is provided on a disc sold together with the data cable).
3. Open “Control Panel” of your PC, select “Phone and Modem”. And you can see “Alcatel USB CDC Modem” in modem list, which means the connection is OK.
4. Open “Control Panel” of your PC, select “Network and Dialing Connection”, select “Network Connection”, and create new connection (may be different according to

your operating system)

Dial: #777

User: card

Password: card

5. Dial to the Internet with speed up to 153.6kbps (which change according to the local network condition)

Note:

- If there are too many users in the service area of one Base Station, your dialing may need to retry several times to be connected.
- During surfing, the connection may drop because of fluctuation of wireless signal. Please redial to restore the connection.
- When the connection drops, please check your phone's setting and ensure the phone being in the status of "Connected to PC".
- When your phone cannot connect to PC, please try restarting your phone or PC.

13 Getting Help

Customer support

Your service provider's customer support department may be accessible directly from your phone when you dial a number (check with your service provider). They can answer questions about your phone, phone bill, call coverage area, and specific features available to you, such as call forwarding.

Before requesting support, please try to reproduce and isolate the problem. When you contact the Customer Care Center, be ready to provide the following information:

- The name of your service provider.
- The actual error message or problem you are experiencing.
- The steps you took to reproduce the problem.
- The phone's electronic serial number (ESN).
- To find the ESN:
 - a) Remove the battery.
 - b) Locate the white label on the back of the phone. Your phone's ESN is located on the label.
